## PROFESSIONAL SUMMARY

Experienced Developer with years of expertise in building responsive and user-centric applications using React and React Native. Proficient in crafting cross-platform solutions, integrating APIs, optimizing performance, and delivering scalable apps to enhance user engagement.

## PROFESSIONAL EXPERIENCE

**Frontend Engineer**                                                                04/2025
*SuperADS*                                                                California, USA

- Engineered and migrated major sections of the company website from WordPress to a modern **Next.js, React, and TypeScript** stack, while simultaneously maintaining and enhancing legacy WordPress components.
- Spearheaded **frontend performance optimization** across both Next.js and WordPress environments, leveraging techniques like code splitting and image optimization to significantly enhance **Lighthouse scores** and **Core Web Vitals**.
- Architected reusable **React components** with **TypeScript** for the Next.js application, ensuring type safety, reducing bugs, and improving code maintainability.
- Managed the full **deployment lifecycle** for multiple projects across the hybrid tech stack, ensuring consistent and reliable updates.
- Developed, deployed, and maintained a wide range of web pages, including critical **service landing pages** and core website components, focusing on usability, accessibility, and conversion.

**Frontend Engineer (Contract)**                                                    03/2025
*Polaris Bank*                                                                Lagos, Nigeria

- Translated high-fidelity Figma designs into responsive, pixel-perfect web pages using HTML, CSS, and JavaScript.

- Optimized existing web pages for improved performance, accessibility, and responsiveness across various devices (mobile, tablet, desktop).
- Conducted cross-browser testing and troubleshooting to ensure consistent user experience.
- Improved page load speed and mobile usability by refining layouts and media queries.

### Software Team Lead
*Gurugeeks Royalty Limited*

04/2024
Lagos, Nigeria

- Lead and oversee all frontend development projects, ensuring adherence to coding standards, best practices, and project timelines.
- Review, approve, and provide feedback on code submissions from the frontend team across multiple applications.
- Collaborate with the backend team to ensure smooth integration of frontend and backend functionalities, addressing technical challenges, and aligning development efforts.
- Manage cross-functional project updates, coordinating between teams to ensure efficient delivery and smooth workflow.
- Provide mentorship and technical guidance to frontend developers, fostering a collaborative and high-performing team environment.
- Work on multiple frontend projects, contributing to development, problem-solving, and feature enhancement as required.

### Frontend Engineer
*Vittas International*

02/2023
Lagos, Nigeria

- Website Revamp: Contributed to the revamp of Vittas Finance's website, aligning it with the company's branding and strategic goals.
- Mobile App: Built the mobile app version of Vittas Loan App with React Native(Expo).
- Bug Fixing: Proactively identified and resolved website bugs and issues to maintain a seamless user experience.
- Feature Implementation: Contributing actively to the development and implementation of new features and functionalities to enhance digital services and customer engagement.
- UI/UX Enhancement: Collaborating closely with designers to optimize the website's user interface and user experience, incorporating responsive design principles.
- Performance Optimization: Ensured fast loading times and smooth navigation by optimizing website performance for speed and efficiency.
- Code Quality: Maintained high coding standards, writing clean, maintainable, and scalable code while adhering to best practices.
- Continuous Learning: Staying up-to-date with the latest trends and technologies in web development, React.js, and Tailwind CSS to recommend and implement improvements.

### Frontend Engineer
*Zealight innovations lab*

04/2022
Lagos, Nigeria

Collaboratively built several Projects with ReactJs and React Native
- Developed Mobile Applications with React Native
- Developed Scalable UIs using ReactJs Framework
- Collaborated in the Implementations of Different websites and Web Apps like Howbodi website, Jojolo, Wms, MyEstate App, and lots more
- Translated designs and wireframes into high-quality codes

- Consumed Endpoints (APIs) and integrated them on the User-end
- Fixed user-end related Bugs
- Deployed codes and performed series of Git operations

### Frontend Engineer
*T40 Technologies*

04/2022
Remote

- I worked on the Mobile app for additioanl features using React native Expo
- I implemented a claim cashback section on one of the company's website (intercity.ng), Connected the endpoints for this to function as expected and deployed my codes on bitbucket where it was merged after testing it on the production Endpoint Url,
  This allows users to Get 1% cashback on all rides booked & parcels sent

  - I fixed the bugs of the bookings section not displaying the data from the endpoint and also updated the UI after the bugs were fixed .
  - I worked on making the wallet balance update immediately after every transaction without having to refresh the website.
  - I worked on Fixing bugs on the Blog website and connecting Endpoints from backend and also updated the UI
  - I deployed codes on Bitbuckets and performed series of Git operations
  - Worked on Responsiveness of pages on the Operator dashboard and added Pagination and filters as instructed.
  - Consumed several endpoints and implemented them on the User-end and also developed/Updated UIs.

### Frontend Developer
*Skillup Africa*

01/2021
Lagos, Nigeria

- Built several projects making use of React Native and ReactJs.
- Collaborated with team members to work on different projects for the Organization
- Built Mobile apps with the use of React Native
- Developing and maintaining the User interface.
- Implementing designs on mobile websites.
- Fixing Bugs and testing for Usability.
